POP QUIZ

Biology – Cellular Structure

Instructions: Read each question carefully before answering all of the questions. Write your answers directly on this sheet.
Time Limit: 15 minutes

Question 1: Cell Organelles
Identify the cell organelle responsible for energy production in eukaryotic cells.

Question 2: Cell Membrane
Explain the primary function of the cell membrane and provide an example of a molecule that can pass through it.

Question 3: Mitosis
List the stages of mitosis in the correct order.

Question 4: Genetic Material
State whether DNA is located in the nucleus or the cytoplasm of a eukaryotic cell. Justify your answer.

Question 5: Osmosis
Define osmosis and describe its role in maintaining cell structure.
