Student Interest Survey

Answering these questions below will help me understand your interests more deeply which will allow me to start to tailor your instruction and assessment directly to your present interests and curiosities. This should be more fun and engaging for both myself as a teacher, and, more importantly, you as a student.

I am not requiring that you answer any questions in particular, only that you answer the questions that you believe would most help this process as thoroughly as you are able.

I am the only one that will be viewing these responses.

Thank you for helping me and your fellow students by improving our shared classroom environment.

Your email address (**jgrover@biddefordschools.me**) will be recorded when you submit this form. Not **jgrover**? Sign out

1. **Please describe below your relationship with math and the math classes you have had in your school career.**

2. **If you had your choice, what things would your ideal classroom (for mathematics or otherwise) include?**

3. **If you had your choice, what would your ideal classroom NOT include?**
